**NOTICE OF LOCATION AND
DESIGN APPROVAL
CSHP-0007-00(613) DEKALB
COUNTY**

++P. I. NUMBER 0007613++

Notice is hereby given in compliance with Georgia Code 22-2-109 and 32-3-5 that the Georgia Department of Transportation has approved the Location and Design of this project.

The date of location and design approval is: **June 30, 2016**.

The City of Clarkston is seeking to implement streetscape improvements that will ultimately revitalize the downtown and surrounding areas within the City limits. The roadway corridors identified for improvement include E. Ponce De Leon Avenue (from I-285 to Market Street), Market Street (from N. Indian Creek to Rowland Street), Rowland Street (from Market Street to Norman Road) and Norman Road (from Church Street to the City Limits). This project located 100% in DeKalb County and Congressional District 4 and is within Land District 18.

The purpose of the project is to enhance vehicular, pedestrian and bicycle safety along major roadways in the City. Street furnishings to include decorative signage, arbors, planters, benches and trash receptacles are planned enhancements throughout this projects limits. Articulated crosswalks with handicapped ramps in addition to improved signalization at in-

lanes along both sides of the roadway. Sidewalk is planned to be widened from 4 feet to 5 feet along the western side. Three "ease-outs" or small narrow landscaped medians are planned to slow traffic. Norman Road is planned for full depth pavement reclamation up to the dam. Milling and overlay is planned for the roadway located on top of the dam. A boardwalk parallel to the southern edge of the roadway and below the dam is planned to provide an accessible route to Milam Park and a relocated fishing pier.

This project is proposed to be constructed in two phases. Clear and visible signage will be placed during construction to make nearby residents, business owners and customers aware of active construction, any detours and/or any closures.

Drawings of the proposed project, as approved, are on file and are available for public inspection at the Georgia Department of Transportation:

**NOTICE OF LOCATION
AND DESIGN APPROVAL
DEKALB AND GWINNETT
COUNTIES**

++P. I. NUMBER 0012814++

Notice is hereby given in compliance with Georgia Code 22-2-109 and 32-3-5 that the Georgia Department of Transportation has approved the Location and Design of this project.

The date of location and design approval is: **July 26, 2016**

This project is located along SR 8/US 29/Scott Blvd, SR 8/US29/Lawrenceville Hwy, and SR 236/Hugh Howell Rd in DeKalb County, Land District 18 - Land Lots 49, 50, 62, 63, 180, 181, 188, 216, 217, and 256. This project is also located along SR 8/US29/Lawrenceville Hwy in Gwinnett County, Land District 6 - Land Lots 140, 142, 145, 146, and 240. This project is located in Congressional Districts 4 and 7.

This project consists of the upgrade of traffic signals at 8 locations within the City of Lilburn and unincorporated areas in Gwinnett account and unincorporated areas in DeKalb County. The upgrades will include updated controllers, signals, and pedestrian facilities.

Drawings or maps or plats of the proposed project, as approved, are on file and are available for public inspection at the Georgia Department of Transportation:
James Humphrey,
Area 1 Engineer

imately 0.6 miles.

Both SR 212 and CR 594 propose single 12-ft travel lanes in each direction with 10-ft to 16-ft wide urban border areas that include sidewalks that vary from 5-ft to 10-ft in width. These travel lanes would transition to two 12-ft lanes as they approach the roundabout and would transition back to single lanes after exiting. 4-ft bike lanes would be on each approach, but would not continue through the roundabout. The proposed roundabout has an inscribed circle diameter of 190 feet and includes a 12-ft truck apron along with 14-ft to 19-ft circulatory lanes. Splitter Islands with pedestrian crosswalks, lighting, and landscaping will also be provided at and around the roundabout. Outside the roundabout, the roadways as proposed include a raised median that varies in width from 0-ft to 35-ft.

Drawings or maps or plats of the proposed project, as approved, are on file and are available for public inspection at the Georgia Department of Transportation:

James "Brad" Humphrey, Area 1 Engineer, District 7
